18TH ANNUAL NEONATAL & PEDIATRIC
AIRBORNE TRANSPORT CONFERENCE

MAY 4-6, 2022 | AUSTIN, TEXAS

Hosted by:

About the Conference

Join us for the 18th Annual Neonatal and Pediatric Airborne Transport Conference in Austin, Texas on May 4 - 6, 2022. This conference allows transport professionals to learn new techniques and the latest advances in neonatal and pediatric transport from experts in their field.

Austin, the state capital, is known for its easygoing attitude, musical talent, cultural scene, and friendly atmosphere. In keeping with this casual and playful spirit, we have incorporated fun networking events which allow our attendees to interact with other teams from across the US, Canada, and around the world.

Wednesday Pre-Conference Sessions

Come in early and participate in a more intimate educational session. The pre-conference sessions are small group, hands-on, educational experiences designed to further your skills and knowledge on critical transport topics and techniques.

Wednesday Night Welcome Fiesta

Please join us for a welcome fiesta in the exhibit hall to interact with the vendors, catch up with old friends, and network with new colleagues. Tex-Mex and adult beverages will be provided at the welcome fiesta as we kick off the conference.

Thursday BBQ & Casino Night

Enjoy a leisurely bus ride through the beautiful Texas hill country to the Creekside Pavilion for a fun night of networking with casino games, dancing, door prizes, spirits, and some great Texas BBQ!

Tentative Conference Timeline

HIGH FREQUENCY VENTILATION & NITRIC OXIDE WORKSHOP*

Maintaining protective lung strategies during transport is a primary concern. This workshop provides a small group, hands-on experience with the latest HFV and NO delivery system.

- Troubleshooting of HFV and NO delivery system
- Interact with experienced instructors and the equipment
- Conventional ventilator / HFV and Nitric Oxide setup

FUN WITH PROCEDURES: A LAB PRACTICUM*

Through lectures, demonstrations, and hands-on experience, this procedure lab allows attendees to expand their knowledge and skills with techniques including:

- Difficult intubation
- Chest tube placement
- Thoracentesis
- Pericardiocentesis
- Cardioversion
- Intraosseous placement
