

Positioning Aids

Prone Plus

The Prone Plus provides ventral support to infants with a comfortable, hourglass-shaped pad. They support newborns in the proper prone position by using gravity to facilitate natural rounding of the shoulders, hand-to-mouth coordination, and head-and-trunk alignment.

Prone Plus

Provides standard and consistent prone support while helping to maintain a secure, balanced and flexed position.

Product #	Legacy #	Description	Quantity per case
989805604811	1034167	Prone Plus with knit cover, extra small < 800 g (< 1.8 lb)	6
