

## About the Conference

International Biomedical is hosting its 20th annual AirBorne Neonatal and Pediatric Transport Conference in Austin, Texas on May 8 - 10, 2024. This conference allows transport professionals to learn new techniques and the latest advancements in neonatal and pediatric transport from experts in their field.

### NEW LOCATION!

#### Hyatt Regency | Downtown Austin

Join us in Austin, the state capital of Texas! Enjoy an easygoing attitude, musical talent, and a vibrant cultural scene. Have fun at our networking events throughout the conference to interact with transport teams from across the globe!

### Wednesday, May 8

#### Pre-Conference Sessions + Welcome Fiesta

Come in early and participate in a more intimate educational session. The pre-conference sessions are small group, hands-on, educational experiences designed to further your skills and knowledge on critical transport topics and techniques. Join the welcome fiesta in the exhibit hall for Tex-Mex and to interact with other transport teams and the conference exhibitors.

### Thursday, May 9

#### Main Conference Session + The Oasis & Casino Night (NEW IN 2024!)

The main session begins and runs for a full day on Thursday. Join us in the evening for a leisurely bus ride through the Texas Hill Country to the famous Oasis Bar and Grill on Lake Travis.

### Friday, May 10

#### Main Conference Session + Awards

Our AirBorne conference wraps up Friday at noon after morning sessions and award announcements. Catch a flight out or stay in Austin the whole weekend!

## Pre-Conference Sessions\* (additional fee)

### High Frequency Ventilation and Nitric Oxide Workshop

Maintaining protective lung strategies during transport is a primary concern. This workshop provides a small group, hands-on experience led by faculty at the forefront of neonatal ventilation.

### Fun with Procedures | A Lab Practicum

Through lectures, demonstrations, and hands-on experience, this procedure lab allows attendees to expand their knowledge and skills with techniques including difficult intubation, chest tube placement, thoracentesis, pericardiocentesis, cardioversion and intraosseous placement.

*Class sizes are limited, register early. \*Must be pre-registered for General Session.*
